To Sadikhzada, Ramil (SMART SOLUTIONS) <ramil.sadikhzada@bp.com>; Ramil Sadikhzade <ramil.sadikhzade@smartsolutions.az>

Dear Sir/Madam,

I am pleased to provide this reference for Mr. Ramil Sadikhzada, who worked as a Senior IT Project Manager at BP Azerbaijan from January 2026. In my capacity as OCT Engineer at BP, I worked alongside Ramil on a number of initiatives spanning our onshore and offshore assets, and had the opportunity to observe his performance, technical capabilities, and professional conduct firsthand.

Throughout his tenure, Ramil consistently demonstrated the standards of delivery, safety awareness, and stakeholder engagement that BP expects from its senior project management personnel. He managed a broad portfolio of IT and infrastructure projects within the BP environment, applying a structured methodology aligned with BP's project delivery framework and operational requirements. His work covered the full project lifecycle - from scoping and business case development, through procurement and vendor coordination, to implementation, commissioning, and handover to operations.

Working inside BP is not straightforward. Projects routinely involve multiple stakeholders across operations, HSE, engineering, IT, telecoms, control systems, procurement, and third-party contractors, and they must be delivered against strict safety, compliance, and operational-window constraints. Ramil navigated this environment well. He coordinated effectively across functions, managed offshore interfaces including helicopter mobilization, permit-to-work processes, and live-operations risk, and consistently delivered to plan. He brought strong knowledge of network, security, and infrastructure technologies, and he was equally comfortable engaging with field engineers and with senior stakeholders.

Beyond technical delivery, Ramil is reliable, collaborative, and professional. He communicates clearly, escalates appropriately, takes ownership of his commitments, and is someone I have been confident working with on high-visibility deliverables.

I recommend Ramil without reservation for senior IT project management roles. He would be a strong addition to any organization seeking a capable, delivery-focused, and safety-minded project leader.

Should you require any further information, please feel free to contact me.

Yours sincerely,

Jabrail Jamalov
